Operation

Photos and media can be viewed directly from your memory card or you can copy files to the device that you want to store the copy files.

For instructions on copy files, please see the "Copy file in the file list screen" section on page 10.

Viewing Photo in Slideshow Mode

The digital picture frames is compatible with the following memory cards:

Secure Digital card (SD)

Multi Media Card (MMC)

Memory Stick (MS)

Insert the memory card with the front label facing away from you. Do not force the memory card into the memory slot, if you are unable to easily the memory card, you may have inserted it the wrong way. Reverse it and try again.

Note:

The digital picture frame will only recognize digital picture stored in jpeg format. Digital picture stored in other formats will be ignored by the device.

Make sure you have at least one picture stored on the memory card. The frame will not function properly without a stored picture.

You can also use a USB flash drive. It operated the same way as the memory cards. Simply insert the flash drive into the USB host plug on the side of the frame.

The slideshow of your photos will begin to play automatically. The slideshow will play your photos in the order which they are listed on your memory card. You can rearrange them using a PC.

To select and view an individual picture, please see "Viewing Individual Pictures" on page 5.

5

Main menu

When the digital Picture Frame is turned on, you will see the MENU screen.

There are two memory card slot and one USB port are on the board. If there is a device is inserted in these slot, the corresponding icon will be shown, otherwise it will be hidden.

If the user unplugs the device, it will highlight another device icon; if no device is inserted, highlight the SETUP icon.

13

Trouble shooting:

1.　The frame is flashing or/and freezing.

Make sure the video you are going to play is in Avi (xvid & Divx codec) and the resolution the video is no bigger than 720*576.

2.　The frame does not play picture from the SD card/USB driver.

Make sure all pictures/videos in root directory. And the picture must be JPEG/JPG format.
