Want to be familiar with system in a fast way without prior deploying own system? Please check this quick guide on how to connect the display to your network account and publish programs.

Note: The free account has limited features, please deploy own system as soon as possible.

1. Turn the screen on, navigate to [Network setting], and connect it to your wired/wireless network.

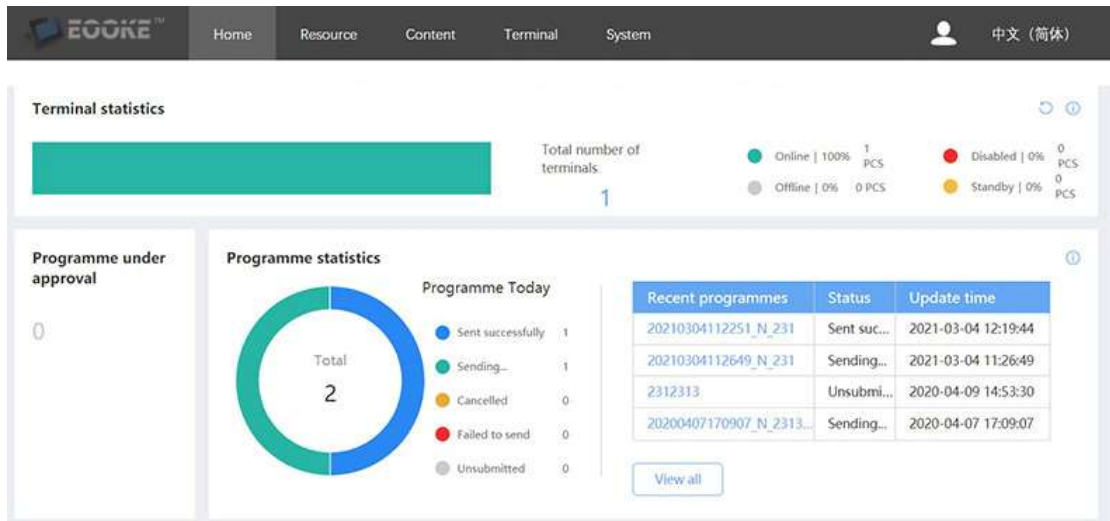

2. Navigate to [information publish] -> [network publish] -> [server info], then input your server info, and click "Sure" to bind the signage screen to system.

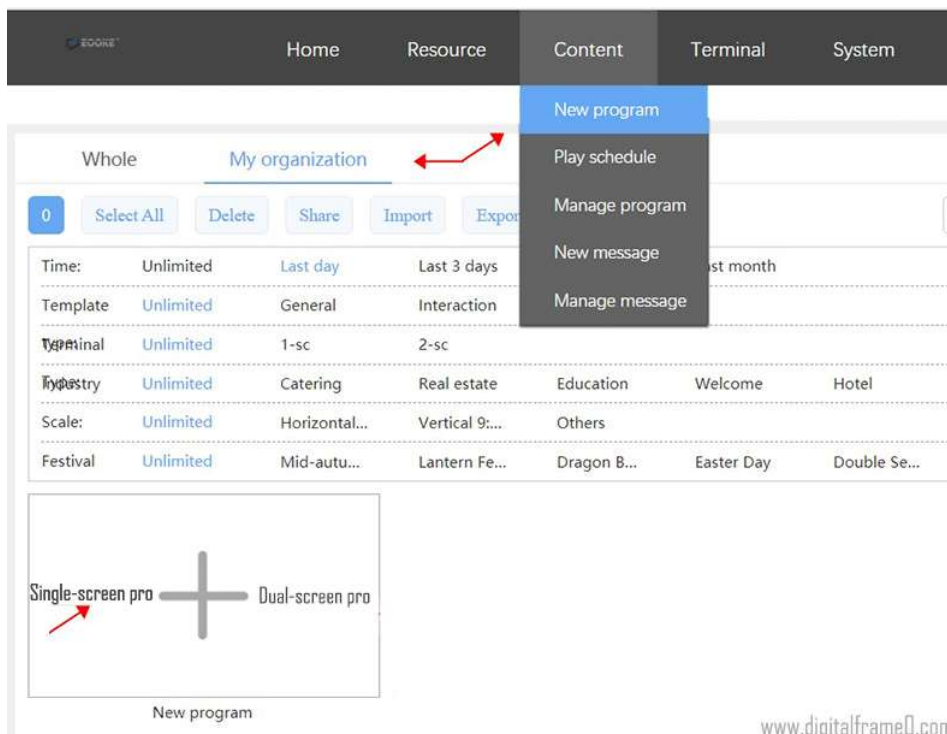

Note:

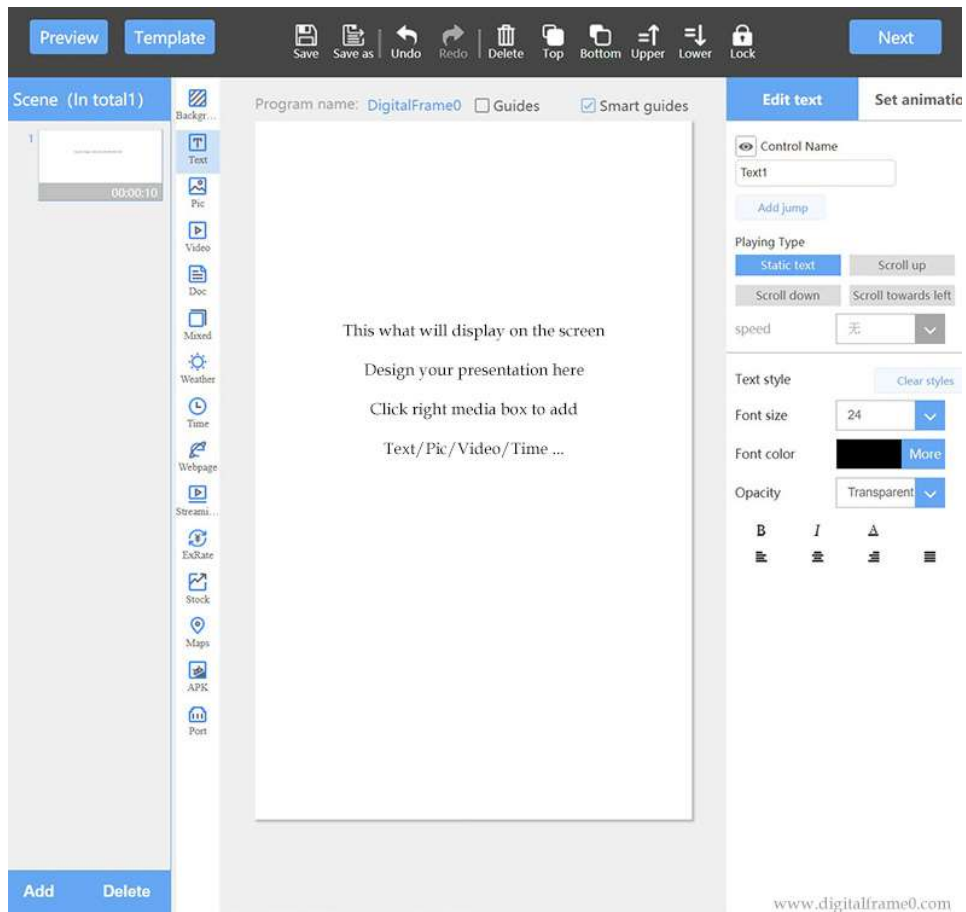

1. Your special Terminal Name, Org ID and server address are available on your manual P35, Readme.txt on USB drive and order shipping email.
2. Don't forget to change the server into in the display when you switch between your own system and free account.
3. Type sever URL in Chrome browser and login, terminals live here.

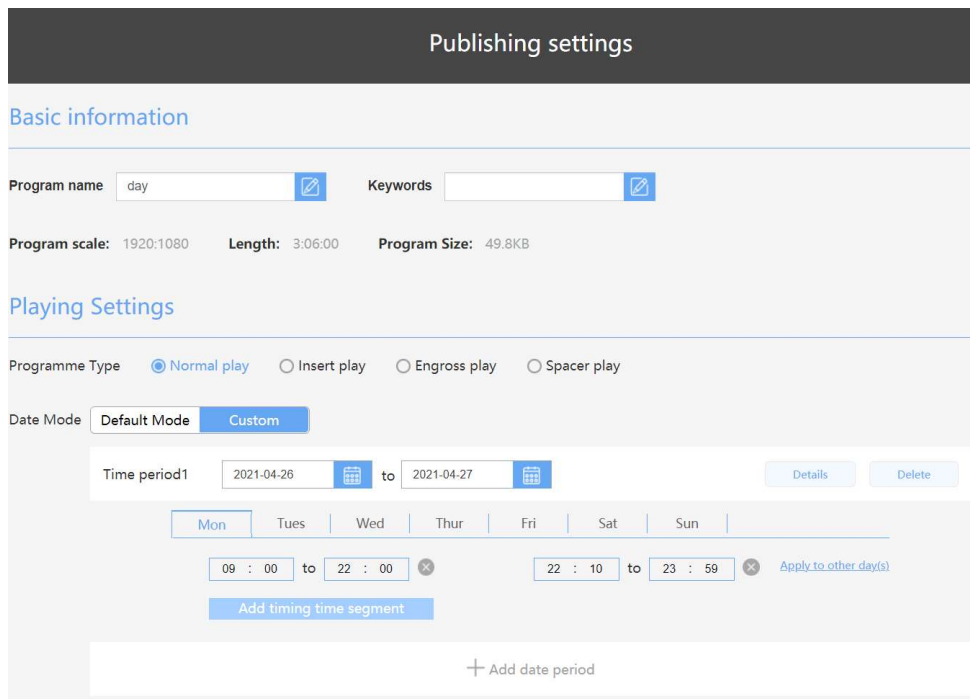

4. Click "New Program" to create new project.

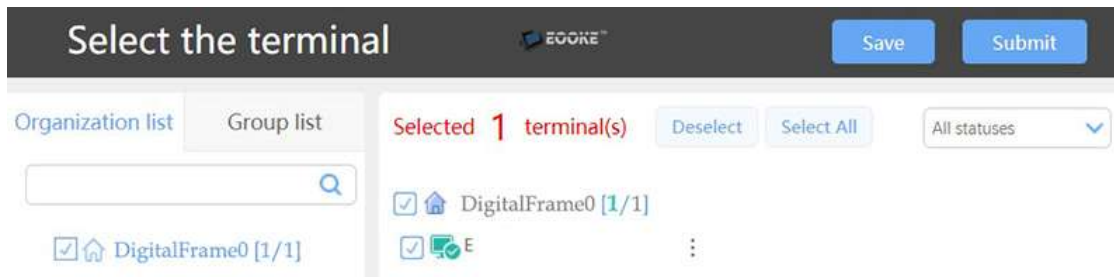

5. Drag and drop, design your project.

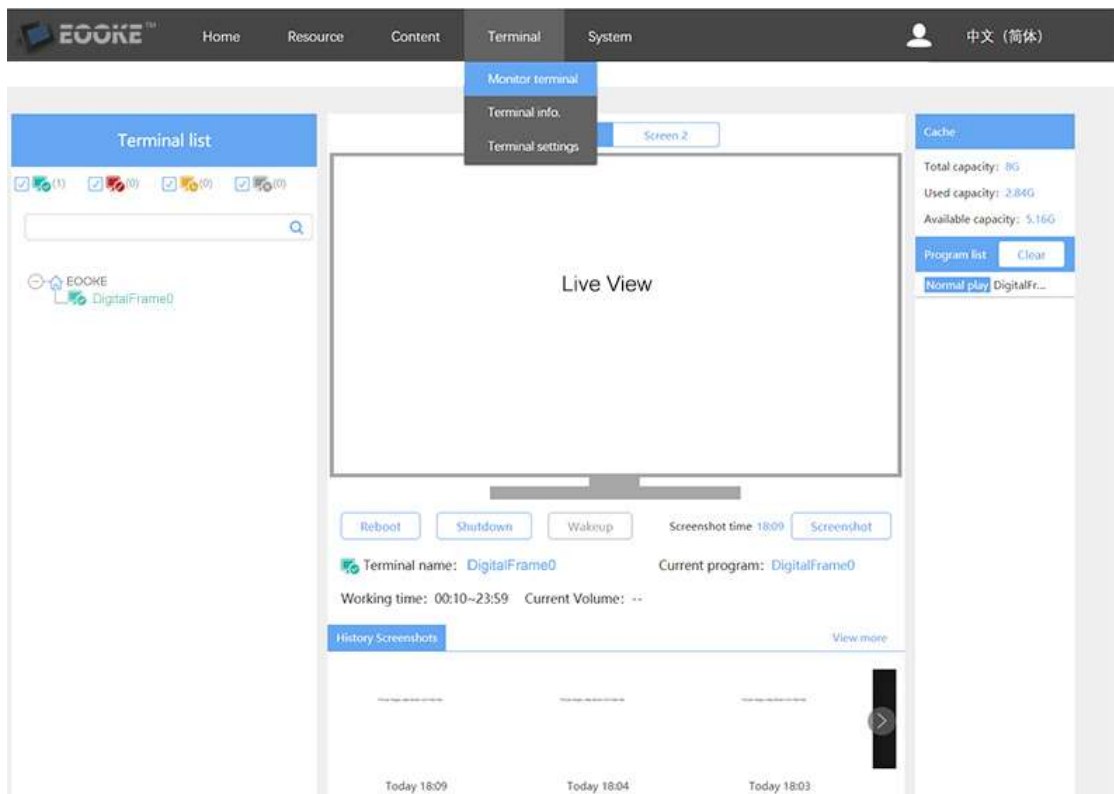

6. Choose program playing type and timer.

7. Select the target terminal display to send files.

8. All done, watch the program live over internet or on target screen.

Note:

1. Please refer to printed manual for full detail on deploying your own system.
2. Please don't hesitate to contact support@digitalframe0.com if you are in need of assistance.
